PROFESSIONAL SUMMARY

Dedicated Software Engineer with expertise in the dynamic realm of full stack development, web infrastructure management, and meticulous data migration.

Experience at architecting API-driven solutions, orchestrating intricate database systems, and fortifying digital landscapes through security domain stewardship.

Collaborative by nature, I excel in cross-functional teams, bridging technical and creative domains to craft user-centric software solutions.

Armed with a tireless passion for innovation, I consistently try to deliver merging cutting-edge technologies with real-world applications.

My journey is marked by a relentless pursuit of staying ahead in the ever-evolving tech landscape, making me an asset poised to engineer the future of software.

TECHNICAL SKILLS

- Python
- PHP
- SQL
- JavaScript
- HTML
- CSS

- Django
- Flask
- Laravel
- Symfony
- Angular
- NodeJS

- Express
- jQuery
- AJAX
- MySQL
- Git
- Agile

- API RESTful
- CI/CD
- MongoDB

EDUCATION

- **CS50X Introduction to Computer Science** -> Link

  Harvard University - edX (2022)

- **PCEP - Python** -> Link

  Python Institute (2023)

- **PCAP - Python** -> Link

  Python Institute (current)

- **Code smells & Refactoring** -> Link

  Codesai (2023)

PROFESSIONAL EXPERIENCE

Idealista (Inmovilla)

Full Stack Developer (Sept 2022 - actualidad)

- **Comprehensive Web Infrastructure Management:**

  -DNS record management, ensuring seamless domain configuration and optimized website routing.

  -Security protocols, implementing SSL certificates and proactive threat mitigation strategies.

  -Managed mail servers, enhancing communication efficiency.

- **Agile Database Administration:**

  -Database management, schema design, optimization, and maintenance.

  -Successfully executed data migration projects, seamlessly transitioning critical information across platforms.

  -Leveraged SQL expertise to ensure data integrity, efficient querying, and performance optimization

- **Responsive Web Development and Migration:**

  -Responsive web development, delivering user-centric interfaces compatible with various devices.

  -Data migration processes, facilitating smooth import and export of complex datasets.

  -Played a pivotal role in designing and implementing RESTful architecture, enhancing system scalability and maintainability.
